

Greetings, CWEA San Francisco Bay Section members!

It's time for the Bay Section Board of Directors election. This year, we have two open Board positions - Second-Year Director and Treasurer. The Second-Year Director automatically progresses through the Board positions, eventually becoming SFBS President in 2015. The Treasurer is a one year position with the option to run for reelection each year. One candidate was nominated for Second-Year Director and one candidate was nominated for Treasurer.

A brief statement from each candidate follows below. Please take a few minutes to review the statements, complete your ballot, and return the completed ballot by mail, fax, or email to Polly Villarreal (contact info below). Completed ballots must be received or postmarked by December 2, 2011. Thank you for your participation in this important process.

Polly Villarreal
CWEA-SFBS Past President and Awards Chair

Lani Good for Second-Year Director

As a professional civil engineer with 10 years of consulting experience in the water and wastewater industry, Lani Good specializes in collection system planning and design. Lani is originally from Phoenix, Arizona and she relocated to the Bay Area in 2007 to be closer to family. She enjoys softball, backpacking, snowboarding, volleyball, good food, good beer, and good company.

Lani has been an active leader in numerous industry associations for the past ten years; she has a passion for WEF and CWEA and is excited to focus her energy on the Bay Section. She recently served CWEA as Chair of the State Students and Young Professionals Committee and on the 2010 Annual Conference Planning Committee, and she has participated as a facilitator for the SFBS Collection System Committee Training Workshops.

Lani understands how important it is in a volunteer organization to engage our members in teambuilding projects that leave each volunteer with long-lasting relationships and a rewarding sense of accomplishment. Lani has an outgoing personality and an affinity for recruiting. As a board member, she hopes to help re-engage inactive members and to connect newer members with the committee or project that most interests them. Only together as a community will we continue to do great things to improve CWEA and the wastewater industry as a whole.

Kevin Krajewski for Treasurer

Kevin has a bachelor's degree in Mechanical Engineering from UC Davis and has been working at V&A in Oakland for 16 years. Kevin is a principal at V&A and is currently the Division Manager of Flow Monitoring.

Kevin has been the Treasurer for the San Francisco Bay Section of CWEA since 2003. Kevin has tried to make systematic improvements to this position including designing and developing a database by which to track the section's finances, eliminate potential data entry mistakes and allow for easier searching capabilities. Kevin enjoys volunteering for this position and giving back to the wastewater industry.
